# GUMDROP-BLUE COLOR MELT

Enjoy adding rich, deep blue tones with Perfect Intensity color.

## Step 1

- Select the areas where pre-lightening is necessary to achieve the desired look.
- Pre-lighten hair with One 'n Only™ Argan Oil Powder Lightener mixed with 20 volume developer and keep off scalp.
- Process until desired lift is achieved. Refer to Perfect Intensity chart for more information.
- Rinse, shampoo and dry hair completely.

## Step 2

- Mix Perfect Intensity in two separate bowls

Formula A-Midnight Blue

Formula B-Electric Teal

Begin applying Formula A to the hair closest to the scalp and work color halfway down the strand. Apply Formula B, blending or feathering the color into the other color to melt it together.

- Process up to 30 minutes.
- Rinse carefully with high-pressure water, trying not to overlap the colors while rinsing.
- Condition and style hair.
